# Marko Lošić

**QA ENGINEER · TEST AUTOMATION**

Banja Luka, Bosnia and Herzegovina · +387 63 759 197 · markolosic1993@gmail.com
markolosic.github.io · linkedin.com/in/markološić · github.com/MarkoLosic

QA Engineer with 6+ years of experience in manual and automated testing of web applications, mobile applications and browser extensions. Automates web tests in Playwright (C#, Page Object Model) and mobile flows in Maestro, with earlier Cypress experience, and runs suites in Jenkins and GitHub Actions CI/CD pipelines. Also tests local LLMs and develops database-driven applications in Oracle APEX with SQL and PL/SQL.

**6+** years in QA · **1000+** releases tested · **500+** automated tests · **50+** products covered

## SKILLS

**Testing:** manual and automated testing; web, mobile and browser extension testing; test planning, strategy and case design; functional, integration and regression testing; REST API testing

**Automation:** Playwright, C#, Cypress, TypeScript, Maestro YAML flows, Page Object Model, Postman

**CI/CD and tooling:** Jenkins, GitHub Actions, Docker, Git, Bitbucket · Windows, Linux, macOS

**AI:** LLM testing, prompt-based evaluation with validation tables, AI-assisted test design

**Collaboration:** Jira, Figma, Agile, Scrum

**Development:** Oracle APEX, SQL, PL/SQL

## EXPERIENCE

### QA Engineer

Jun 2022 – Present

Bravo System · Banja Luka

- Cut regression testing on the product from a full day to about 30 minutes by building and maintaining an automated Playwright suite (C#, Page Object Model) that runs in Docker on every pull request via GitHub Actions; on other projects, suites run in Jenkins pipelines.
- Automate mobile app flows with Maestro across several projects, including the same product.
- Test a local LLM (Llama 3) for product analytics on two projects: 100 domain-specific prompts, every answer validated in a table.
- Manually test web applications, mobile applications and browser extensions to ensure high quality across releases.

Playwright · C# · Maestro · LLM testing

### QA Engineer & Oracle APEX Developer

Jan 2020 – Jun 2022

Krajina Klas · Banja Luka

- Built the team's QA process from the ground up.
- Introduced test automation to the team with Cypress, moving repetitive regression checks from manual runs to automated suites.
- Performed functional, integration and regression testing to ensure application reliability and stability.
- Contributed insights and suggestions during development to improve software quality.
- Designed and developed database-driven applications in Oracle APEX.

Cypress · TypeScript · Oracle APEX · SQL · PL/SQL

## EARLIER EXPERIENCE

**Category Manager** · Tropic, Banja Luka — May 2019 – Jan 2020
Managed the technical and electrical product category: product selection, pricing, inventory and supplier negotiations, backed by market research.

**School Teacher** · OŠ Grahovo, Bosansko Grahovo — May 2018 – May 2019
Planned and delivered engaging lessons for first-grade students.

**Technical Support Agent** · Telemach, Banja Luka — May 2014 – May 2018
Supported internet and EON application users with troubleshooting, and led a team of support agents.

## EDUCATION, TRAINING AND LANGUAGES

**University of Banja Luka** · Bachelor's degree, Elementary School Teacher · 2012 – 2019

**True North program** · Completed the training, then worked as a program trainer

**English** · C1 (Advanced), used daily

## WRITING

Writes about test automation and QA at markolosic.github.io/blog (35+ articles). Selected posts:
