Marko Lošić

QA ENGINEER · TEST AUTOMATION

Banja Luka, Bosnia and Herzegovina · **Open to remote** · +387 63 759 197 · markolosic1993@gmail.com
markolosic.github.io · linkedin.com/in/markološić · github.com/MarkoLosic

QA Engineer with 6+ years of experience in manual and automated testing of web applications, mobile applications and browser extensions, across SaaS creator platforms, e-commerce and product analytics. Automates web tests in Playwright (C#, Page Object Model) and mobile flows in Maestro, with earlier Cypress experience, and runs suites in Jenkins and GitHub Actions CI/CD pipelines. Also tests local LLMs and develops database-driven applications in Oracle APEX with SQL and PL/SQL.

6+ years in QA · **100** automated tests · regression cut from **a full day to ~30 min** · **97%+** LLM accuracy on 100 hand-graded prompts

SKILLS

Testing: manual, exploratory and automated testing; web, mobile, browser extension and cross-browser testing; test planning, strategy and test case design; functional, integration and regression testing; bug reporting and defect tracking; REST API testing; SQL for data validation

Automation: Playwright, C#, Cypress, JavaScript, TypeScript, Maestro YAML flows, Page Object Model, Postman

CI/CD and tooling: Jenkins, GitHub Actions, Docker, Git, Bitbucket, Lighthouse audits · Windows, Linux, macOS

AI: LLM testing, prompt-based evaluation with validation tables, AI-assisted test design

Collaboration: Jira, Figma, Agile, Scrum

Development: Oracle APEX, SQL, PL/SQL

EXPERIENCE

QA Engineer
Jun 2022 – Present

Bravo System · Banja Luka

- Working in a QA team, cut regression testing on a link-in-bio platform from a full day to about 30 minutes by building and maintaining a suite of 100 automated Playwright tests (C#, Page Object Model) that runs in Docker on every pull request via GitHub Actions; on other projects, suites run in Jenkins pipelines.
- Automate mobile app flows with Maestro across several projects, including the same product.
- Test a local LLM (Llama 3) for product analytics on two projects: wrote 100 domain-specific prompts and graded every answer in a validation table; hallucinations and wrong answers in early runs drove prompt-template changes that raised accuracy to 97%+, and the table now serves as the regression set after every model or prompt change.
- Manually test web apps, mobile apps and browser extensions early, on local builds, so most defects are fixed before regression: a regression run now surfaces only 1–2 bugs, and two critical bugs were stopped before production. Every bug report includes steps, expected vs actual, evidence and environment.

Playwright · C# · Maestro · LLM testing

QA Engineer & Oracle APEX Developer
Jan 2020 – Jun 2022

Krajina Klas · Banja Luka

- Built the team's QA process from the ground up: written test cases, a standard bug report template (steps, expected vs actual, evidence) and a Jira workflow for tracking defects.
- Introduced test automation to the team with Cypress: 30 automated tests took over the repetitive regression checks and brought the regression run down to about 1.5 hours.
- Took part in feature brainstorming sessions with developers, bringing the testing perspective in before development started.
- Designed and developed database-driven applications in Oracle APEX.

Cypress · TypeScript · Oracle APEX · SQL · PL/SQL

EARLIER EXPERIENCE

Category Manager · Tropic, Banja Luka — May 2019 – Jan 2020
Managed the technical and electrical product category: product selection, pricing, inventory and supplier negotiations, backed by market research.

School Teacher · OŠ Grahovo, Bosansko Grahovo — May 2018 – May 2019
Planned and delivered engaging lessons for first-grade students, which built my skills in explaining things clearly and teaching people.

Technical Support Agent · Telemach, Banja Luka — May 2014 – May 2018
Supported internet and EON application users with troubleshooting, and led a team of 8 support agents.

EDUCATION, TRAINING AND LANGUAGES

University of Banja Luka · Bachelor's degree, Elementary School Teacher · 2012 – 2019

True North program · Completed the training, then worked as a program trainer, running sessions for teams: hands-on experience in communication and training people

English · C1 (Advanced), used daily

WRITING

Writes about test automation and QA at markolosic.github.io/blog (35+ articles), e.g. flaky Playwright tests, testing idempotency and risk-based testing.

INTERESTS

Marathon running, photography, guitar, hiking and camping.
